

From its inception in 1908, the Department of Biological Chemistry at JHUSOM has prioritized interactive research at the forefront of biomedical knowledge coupled with a strong dedication to trainee development. The Paul T. Englund Scholars program recognizes emerging scholars who have demonstrated potential to forge tomorrow's scientific breakthroughs and promote a creative, diverse, and inclusive future in biochemical research.

Applicants at the postdoctoral or assistant professor level are invited in all areas of mechanistic biology. Applications will be evaluated on both demonstrated scientific contributions and potential for future impact on the field.

We strongly encourage individuals from historically excluded groups in science to apply. Awardees will be recognized and invited to present a seminar in the Paul T. Englund Emerging Scholars series at JHUSOM and will receive an honorarium.

**APPLY:** Email your Biosketch CV and a brief statement (200 words max) highlighting the impact of your research program on the future of the broadly-defined field of Biological Chemistry by October 15, 2022 to [biologicalchemistry@jhmi.edu](mailto:biologicalchemistry@jhmi.edu)

The Department of Biological Chemistry  
at The Johns Hopkins University School of Medicine  
welcomes applicants for the inaugural
